

Environmental Policy	<b>Environmental Policy</b> <b>HA-BE Gehäusebau GmbH</b> <b>HABE USA Inc.</b>	
-------------------------	---	---

HA-BE pursues a strategy and policy to be exemplary in environmental protection. It is also an essential characteristic of the HA-BE management system and is driven by the executive board.

The environmental policy includes all activities at sites in Germany and USA which are directly or indirectly connected to the manufacturing of customer-specific products.

- Our actions are always in a balanced relation of economy and ecology.
- The effort of protecting our environment is an obligation to our today's and future generations.
- We align our actions to environmental guidelines and therefor contribute for a sustainable development of our surroundings.
- We use our energy, water, materials and spaces economically and environmentally conscious. We avoid waste and take care of environmentally compatible disposal for non-avoidable waste.
- We ask our employees and partners to act independently and environmentally.
- We avoid unnecessary transport of goods.
- We use always the newest and most modern technologies for continuously improvement of our processes.
- Due to a permanently monitoring and validation of our environmental activities we can improve our environmental management system continuously.
- Legal provisions are the minimum standard for our environmental commitment.
