

TRT visits HA-BE in China

On June 11, 2015, HA-BE China was pleased to welcome the members of the TRT (Taicang Roundtable) and show them around the company premises. During a tour through the production facilities and a variety of presentations, the members of the TRT were able to get a deep insight into our company and products. The event was rounded off with guest lectures by Ms. Shimei Liu from Siemens Shanghai and Mr. Moritz Mauer from Siemens Beijing.

The TRT is a professional industry organisation currently consisting of 80 members for small and medium-sized enterprises (SME) from Germany and Europe with head offices in Taicang. In close collaboration with the German Foreign Chamber of Commerce, the goal of the TRT is to consolidate the local operational requirements, promote the exchange of information and to optimise cooperation.
